

Hurricane::DBo

```
classDiagram
    class HurricaneNet["Hurricane::Net"]
    class HurricaneEntity["Hurricane::Entity"]
    class HurricaneDBo["Hurricane::DBo"]
    HurricaneNet --|> HurricaneEntity
    HurricaneEntity --|> HurricaneDBo
```

The diagram illustrates a class hierarchy with three classes arranged vertically. At the bottom is the base class, Hurricane::Net, which is represented by a gray-shaded rectangular box. Above it is the intermediate class, Hurricane::Entity, shown in a white rectangular box. At the top is the derived class, Hurricane::DBo, also in a white rectangular box. Two blue arrows point upwards, indicating inheritance: one from Hurricane::Net to Hurricane::Entity, and another from Hurricane::Entity to Hurricane::DBo.
